Siemens Knows IoT and Connected Devices

SIEMENS
Ingenuity for Life

Siemens is the #1 automation provider, delivering mission critical operation and automation technology, with **30M automation systems, 75M contracted smart meters.** And Siemens already has **over 800K connected products in the field today.**

MindApps

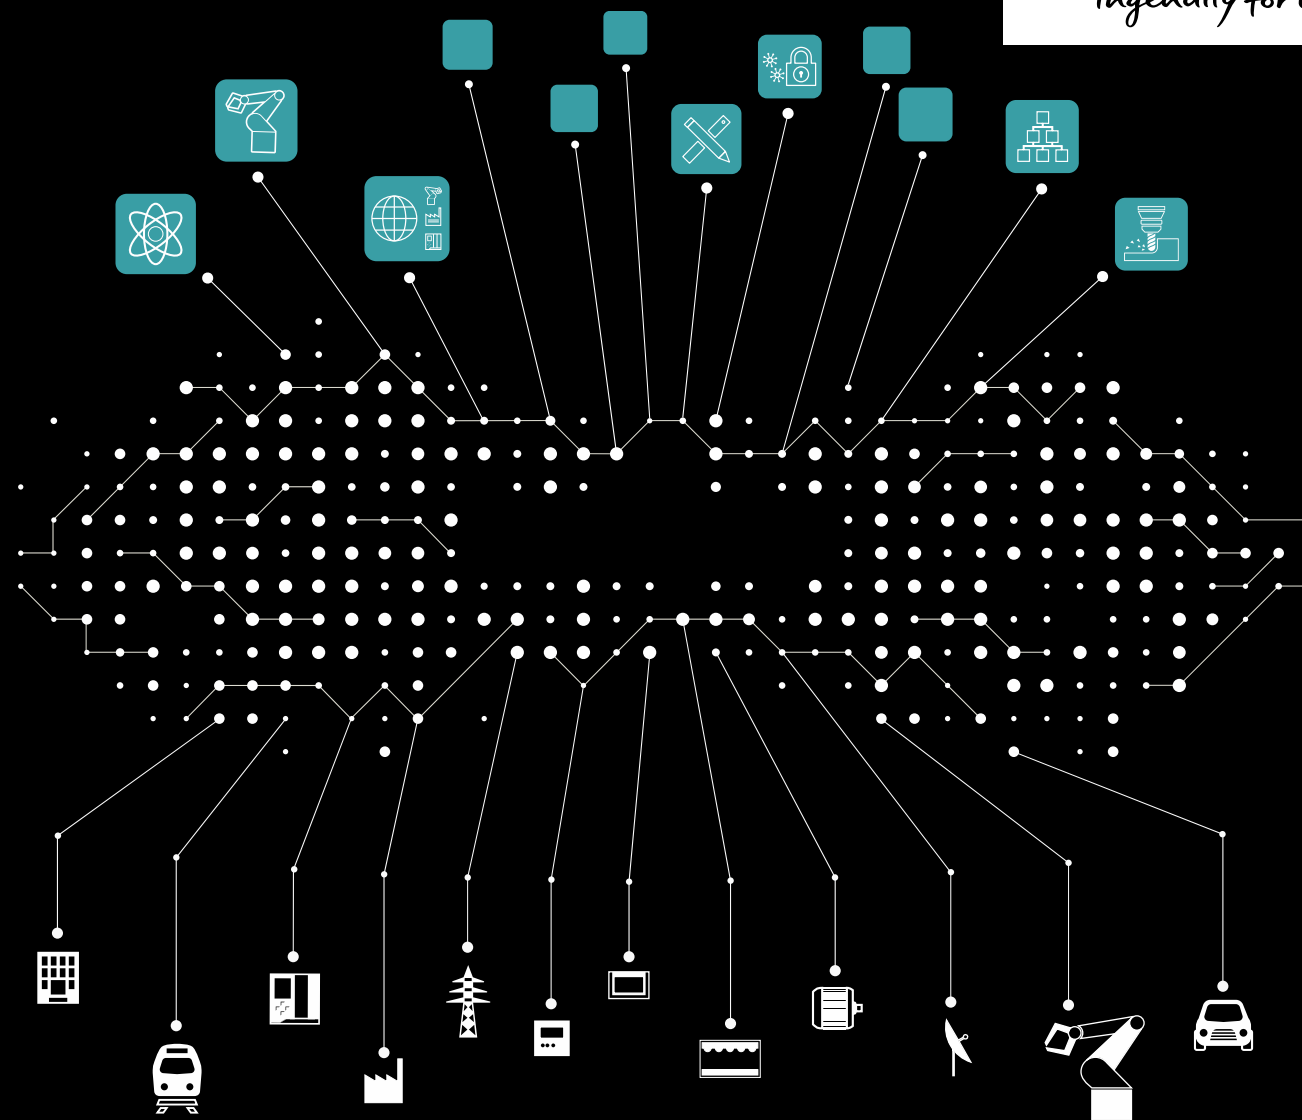

Powerful industry applications and digital services for asset transparency and analytical insights

MindSphere

Open Platform as a Service (PaaS) for scalable, global IoT connectivity and application development

MindConnect

Secure plug and play connection of Siemens and third-party products and equipment

MindSphere - The cloud-based, open IoT Operating System

How can I acquire the current conditions of my machine tools and increase production transparency?

Is my machine tool in a productive condition?

What is the capacity utilization of my machine when planned and actual values are compared?

With Analyze MyPerformance, a targeted weak point analysis and therefore production optimization is possible

How do my individual machine productivities compare with other production lines?

How high is the overall equipment efficiency of my machine tool?

Top highlights of first version Analyze MyPerformance /OEE-Monitor

Transparency of the production status enables ...

... optimized planning of utilization and usage

... a wide range of standard evaluations

- Plant monitoring
- Availability and analysis
- Indicator for current production level
- Overall equipment efficiency (OEE indicators)

... longer machine operating times

... wide range of connectable controller types

... recording of machine operating times conditions

- Machine operating times and conditions
- Number of workpieces
- Differentiation in good and bad parts

... higher levels of availability and productivity

Higher productivity of machine tools thanks to new knowledge and transparency

SIEMENS
Ingenuity for life

Production

More transparency regarding utilization of machine tool capacity

Increased productivity, reliability, and availability

Lower production costs based on more precise planning

The solution

**"User your machines optimally
with better planning."**

How can I make my cutting process more productive?

Can I increase **machine availability** by elimination varying effects of cutting conditions?

How can I achieve **optimum utilization** of machine and tools?

Adaptive Control and Monitoring

Is there a simple way to **reduce cycle time**?

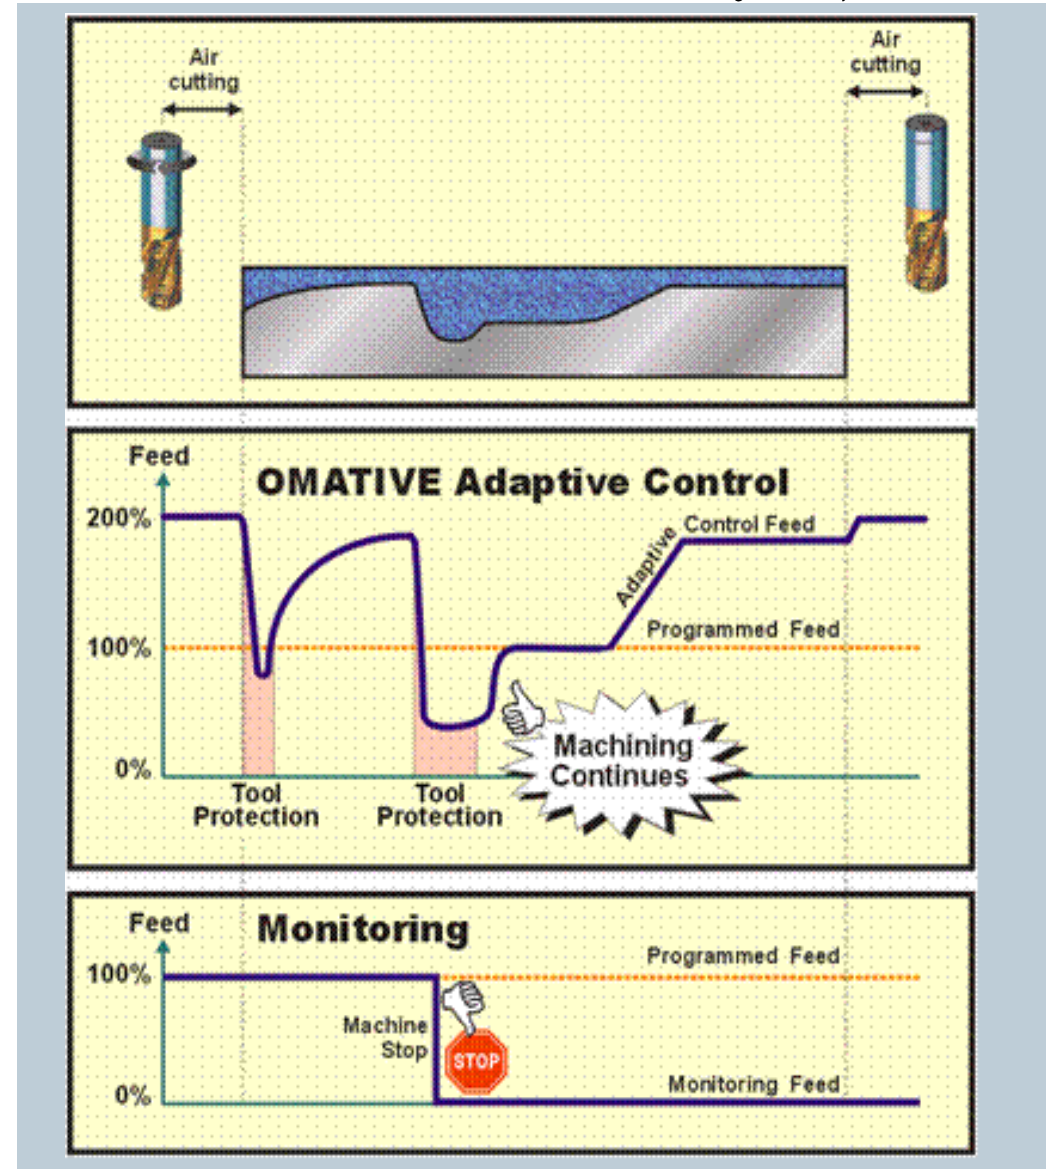

How can I give a give solution for **extending tool life**?

ACM (Adaptive Control and Monitoring)

Main features and added value

SIEMENS
Ingenuity for life

ACM – top highlights

Increased productivity, quality and availability

SIEMENS
Ingenuity for life

... Cycle time reduction

... Increased machine capacity

... Consistently high workpiece quality

... Reduction in downtime

... Optimal utilization of machine and tools

... Elimination of damage to machine tool, fixture and part

... Tool life extension

... Increasing machine operating flexibility
